

No one asked for this:

Computer

A presentation with stock photos, illustrations and a reduced amount of logical jumps!

Motivation

According to Google image search, what do the terms “computer” and “technology” mean?

*Savvy guys in suits
controlling the world*

(Not presented here but also true: “white humanoid robots looking at things”)

*Contrast this with
the personal human
computer relationship:*

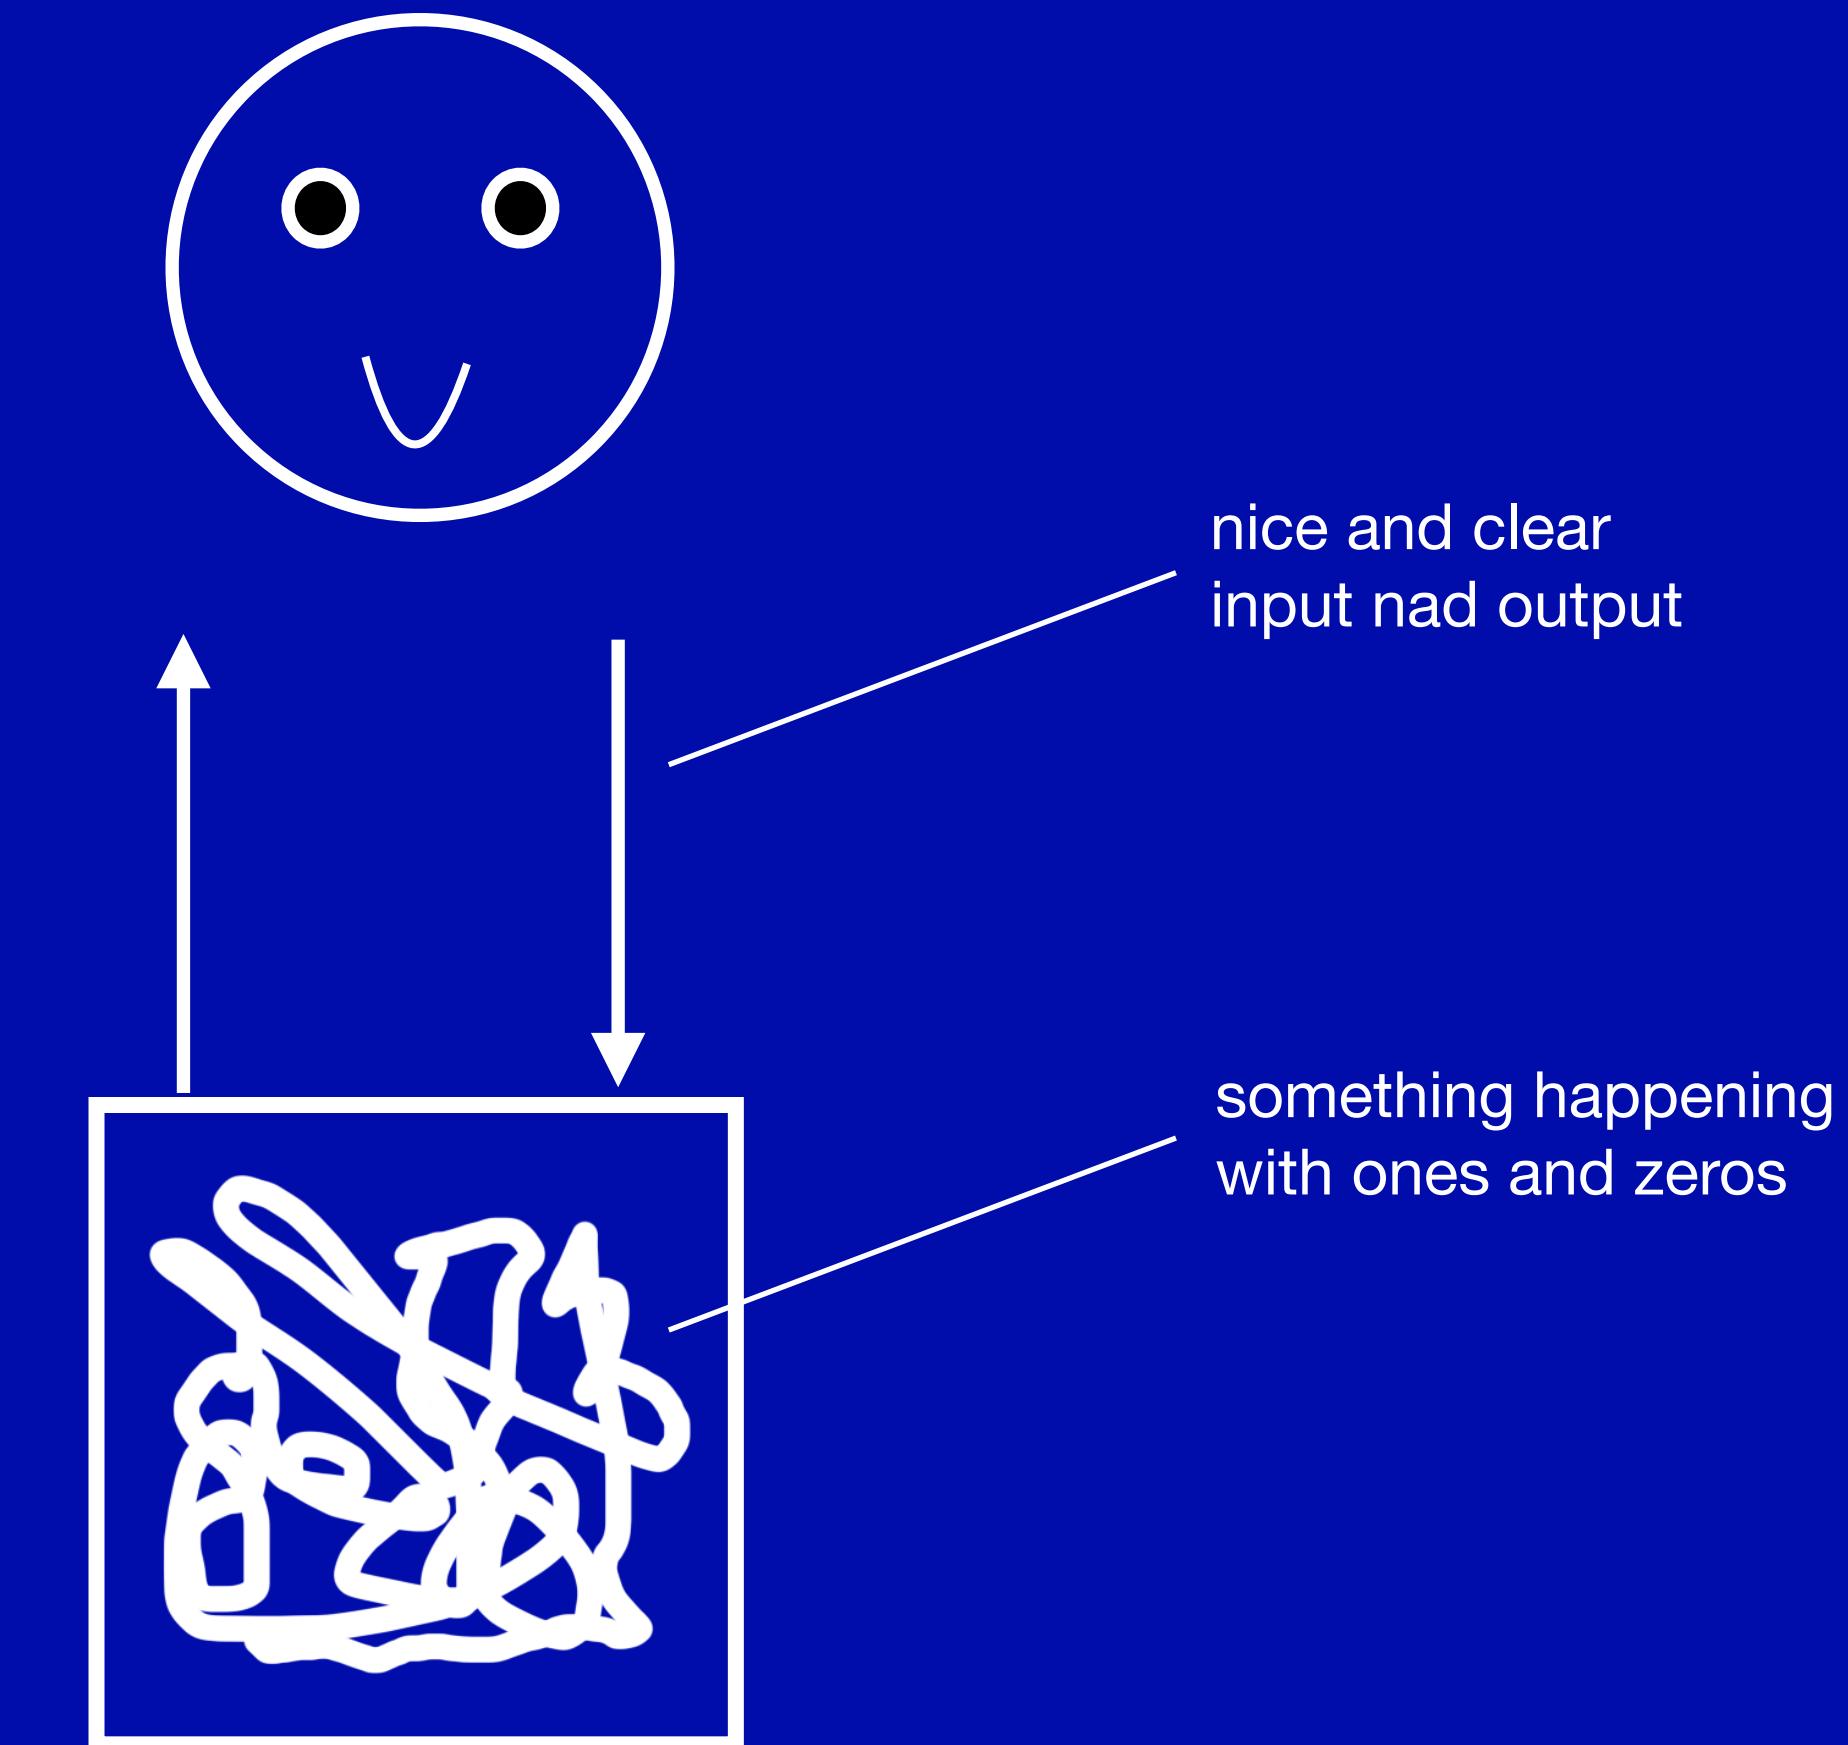

Fig. 1: Everything works as intended

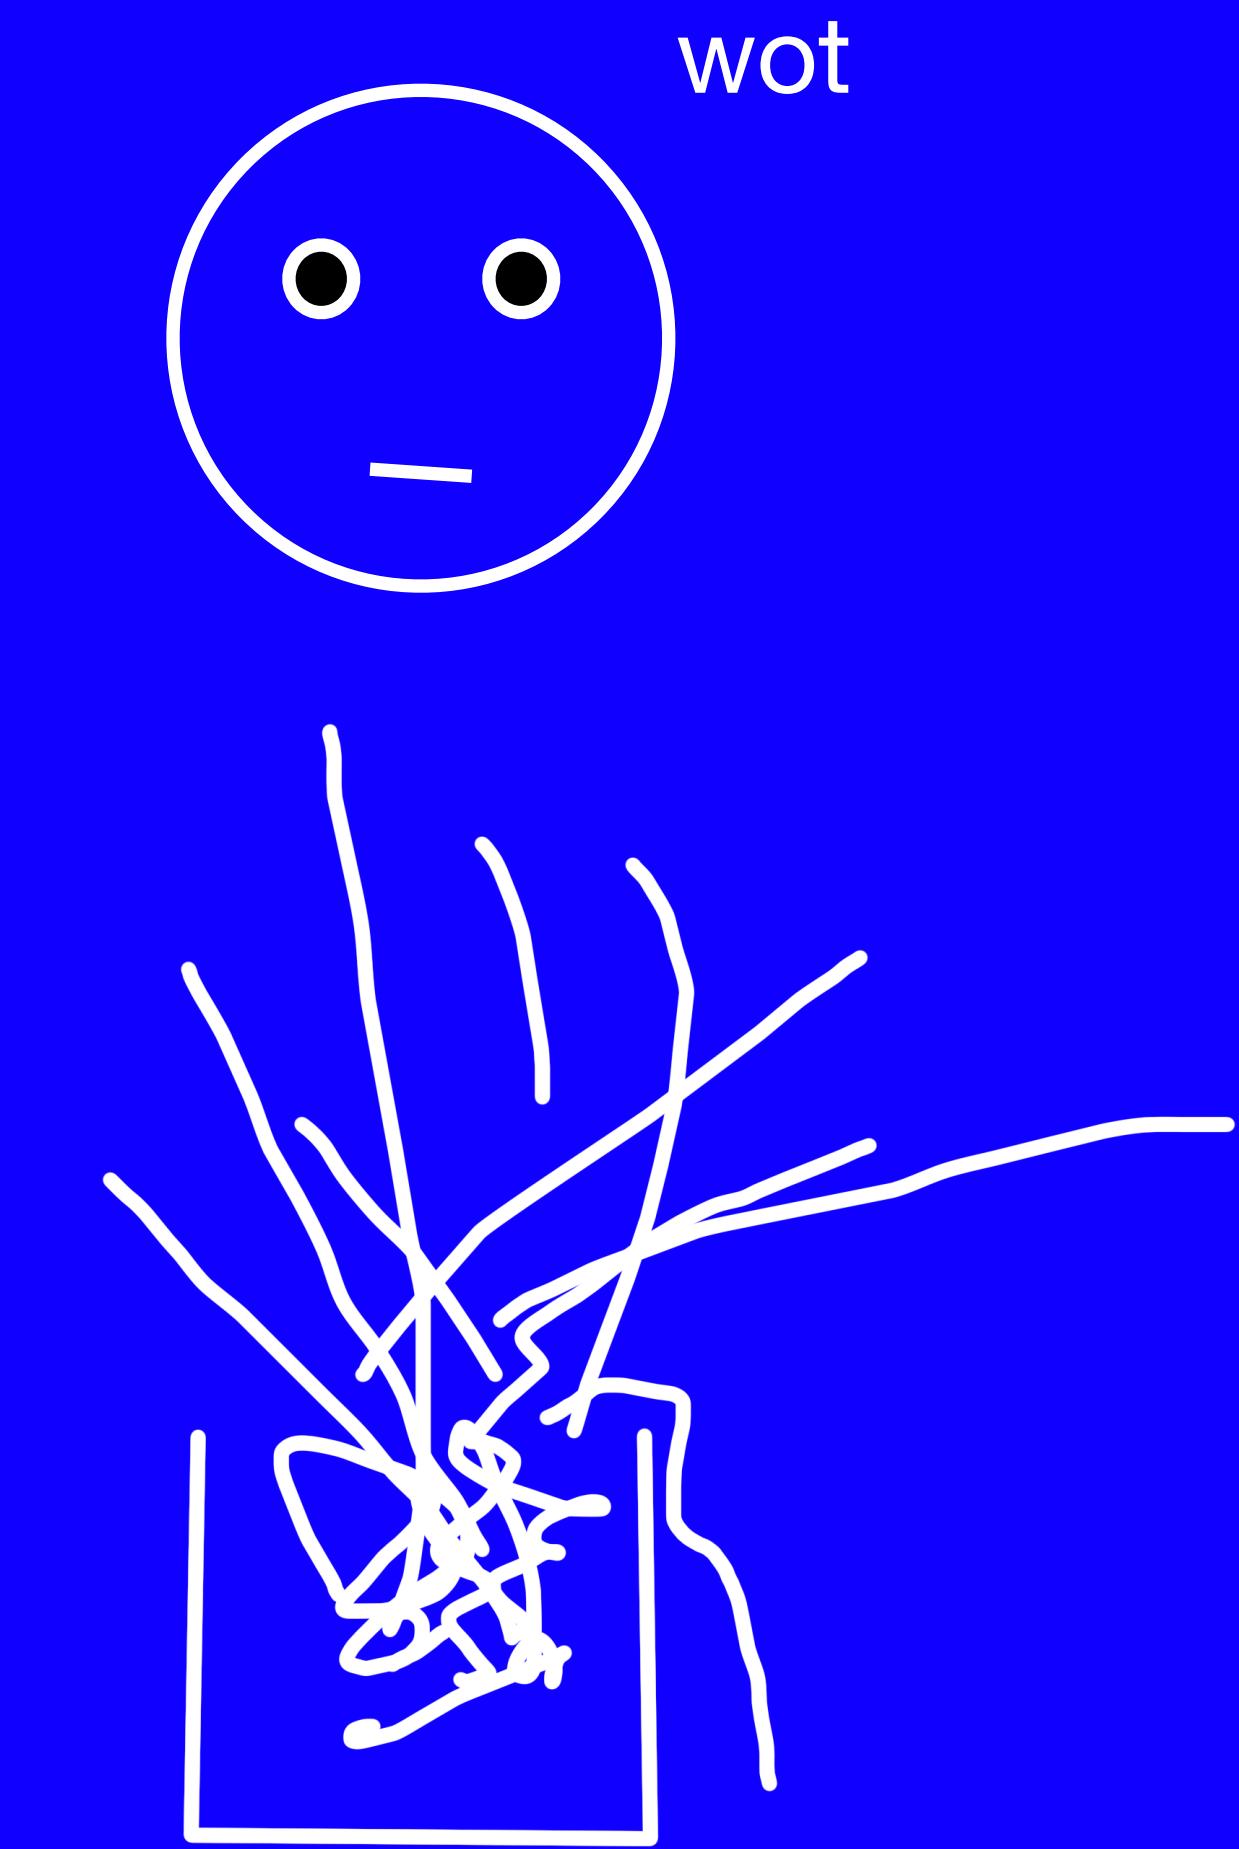

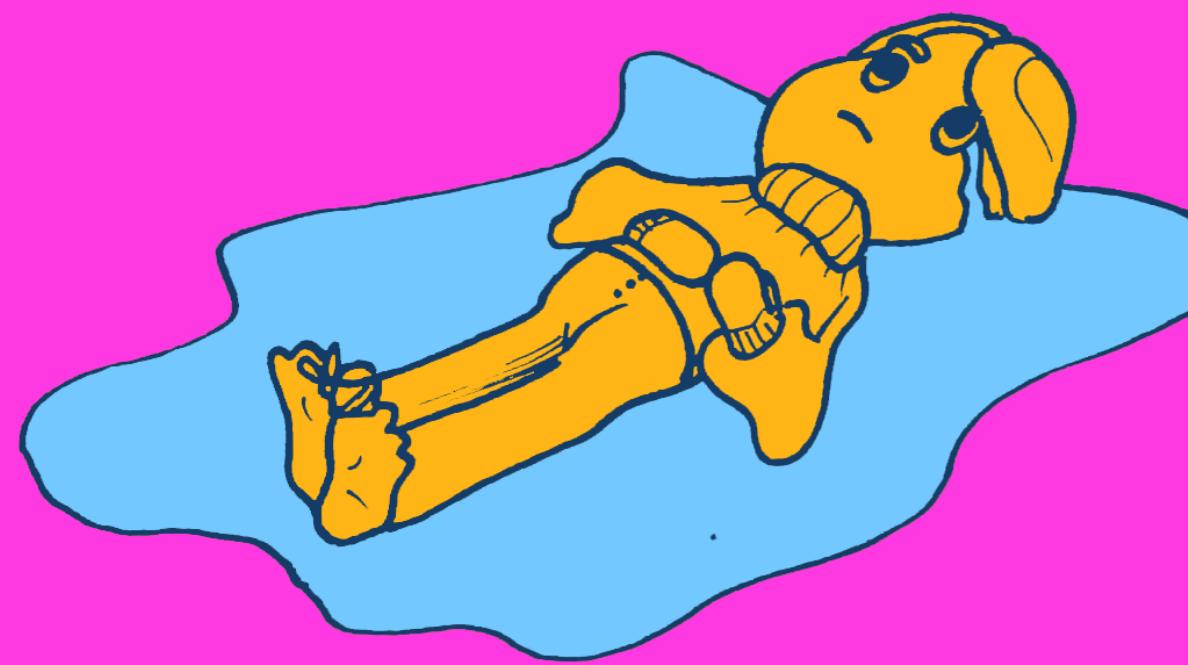

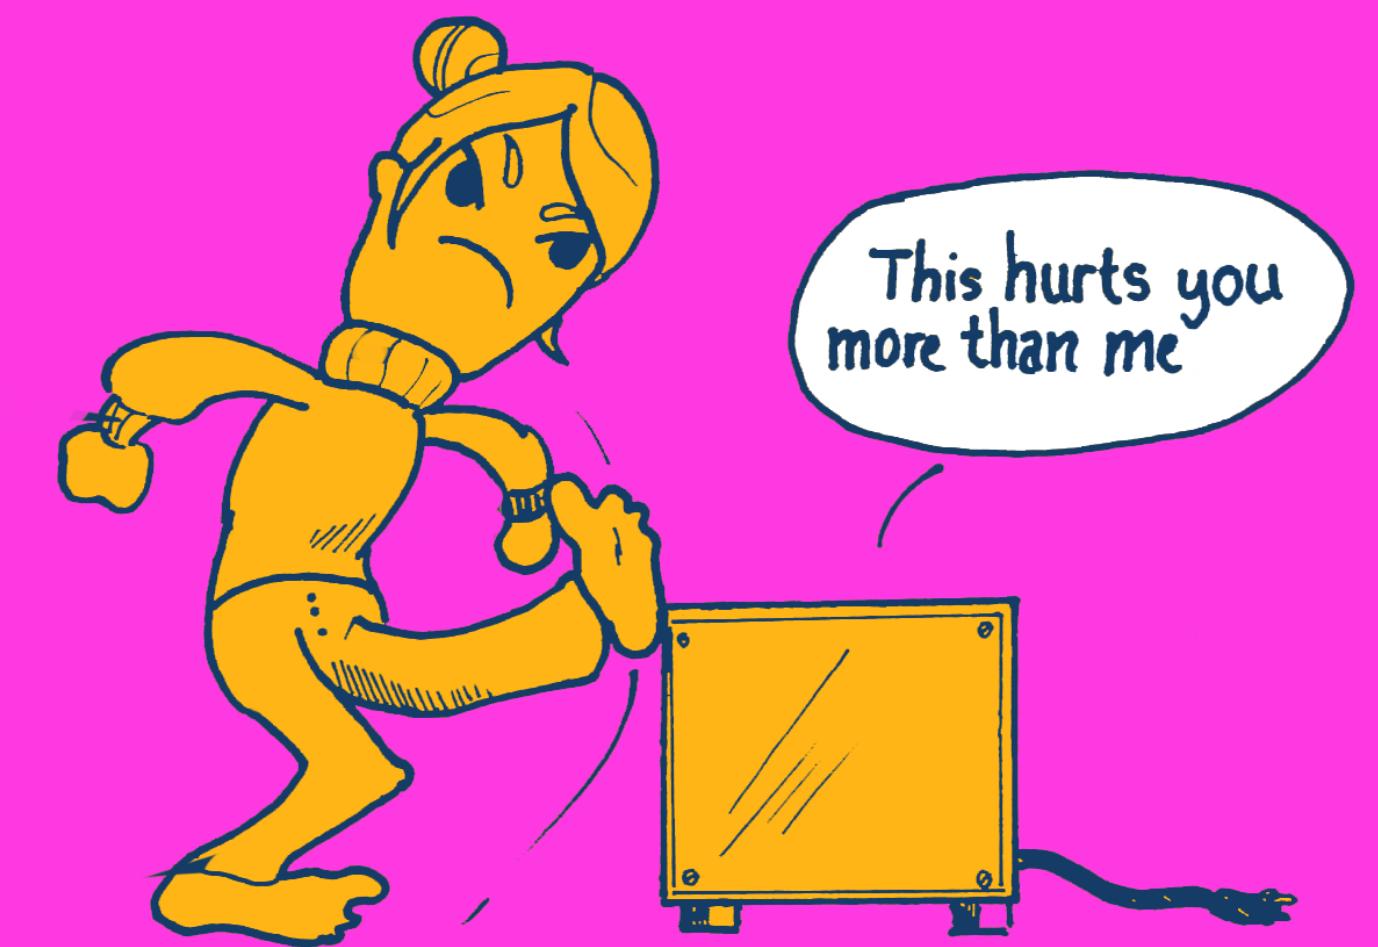

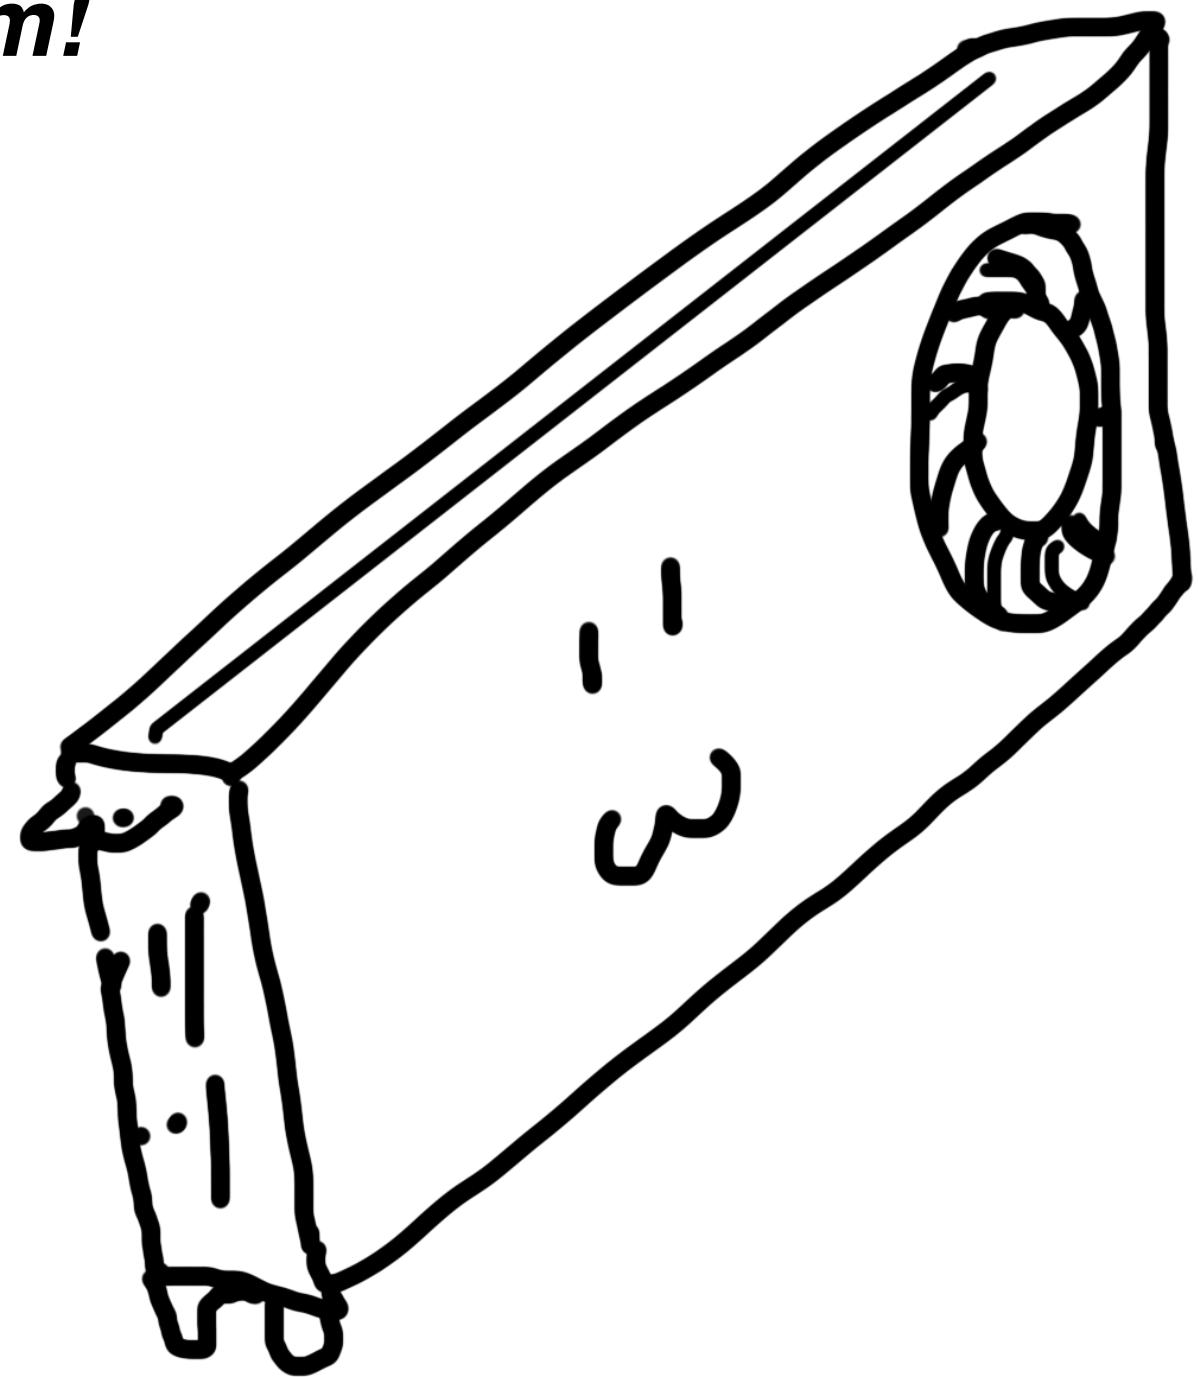

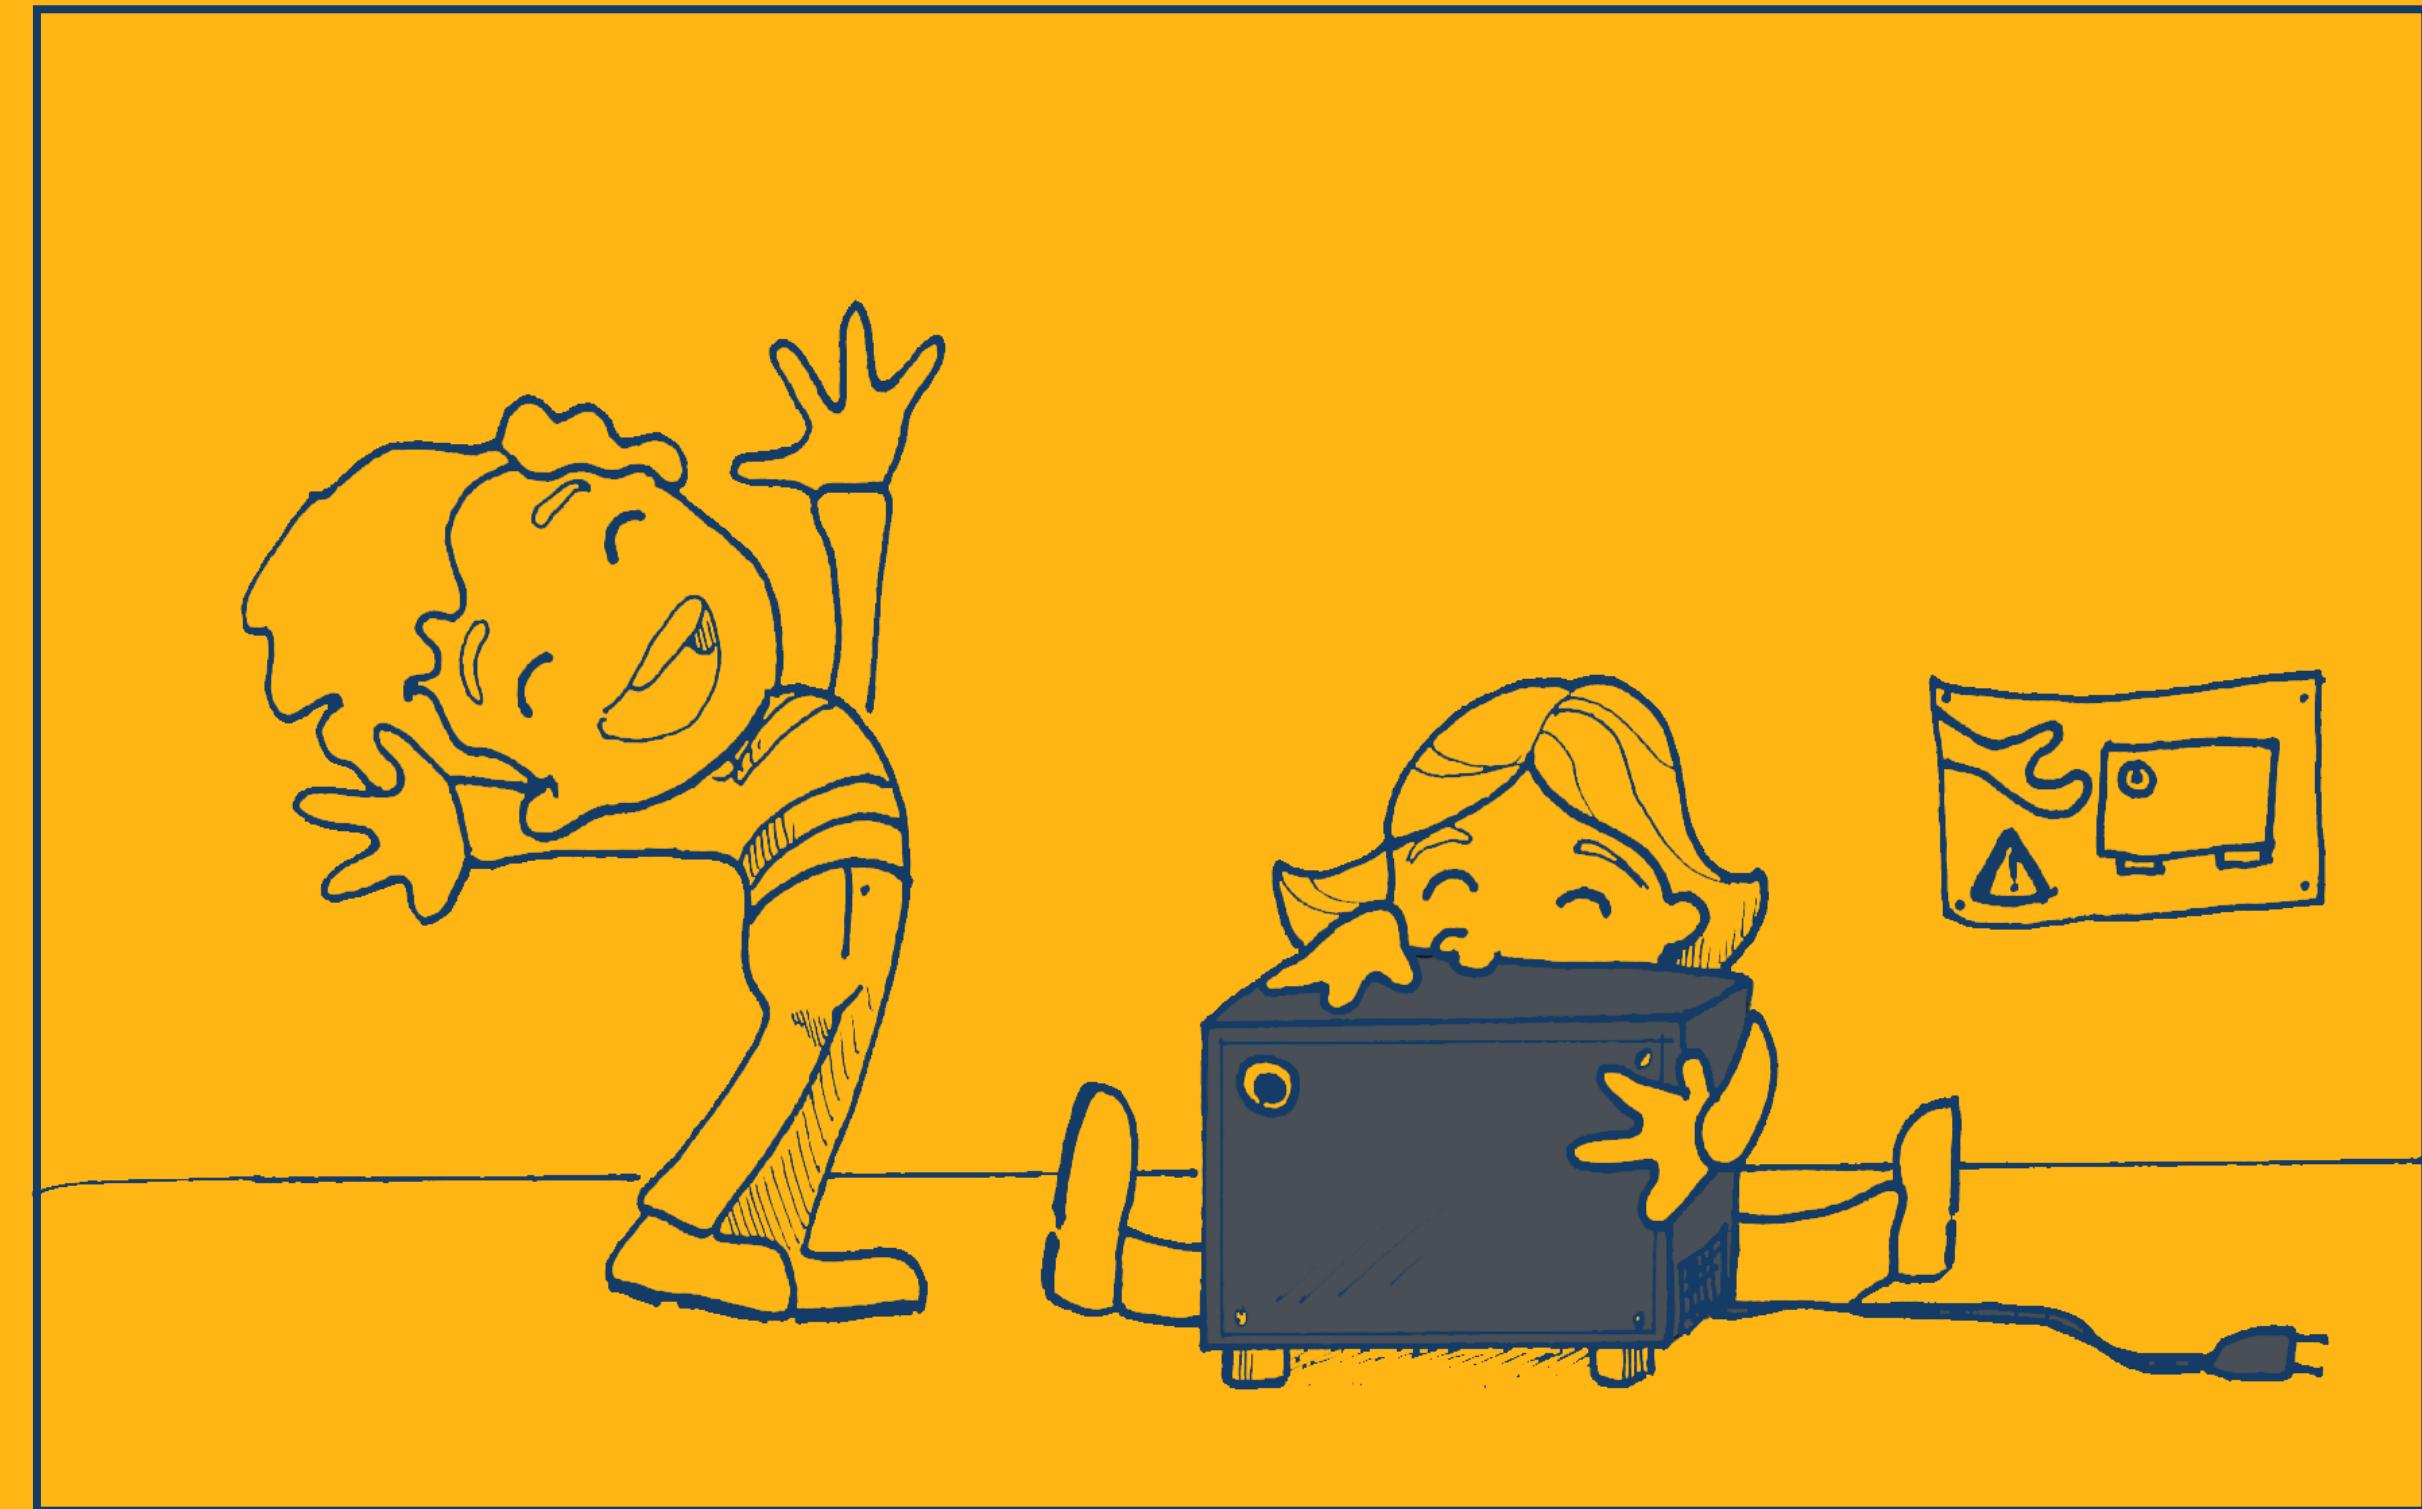

Fig. 2: An error occurs

Don't suspend your disbelief too much.

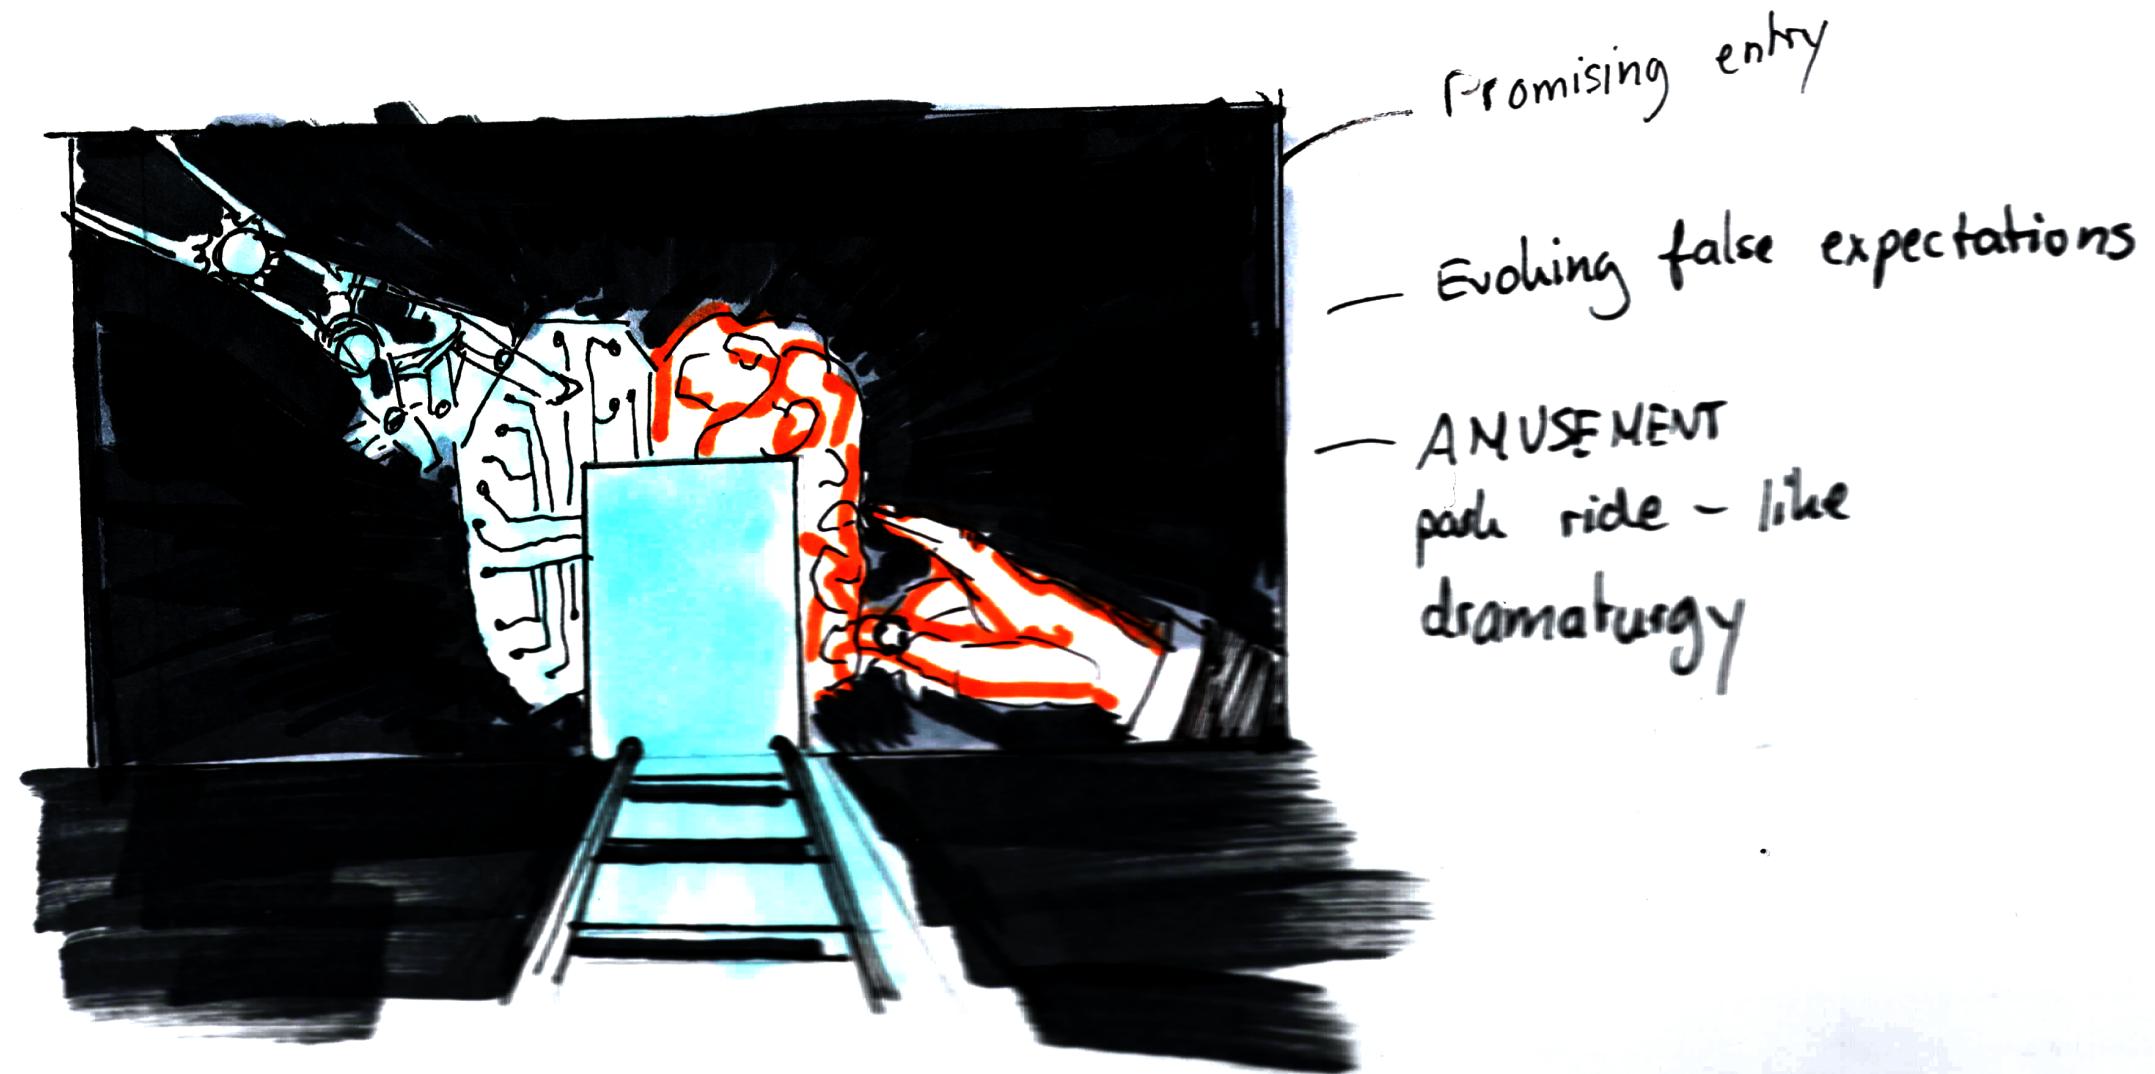

Humanising (or animalising) computers is a good coping mechanism!

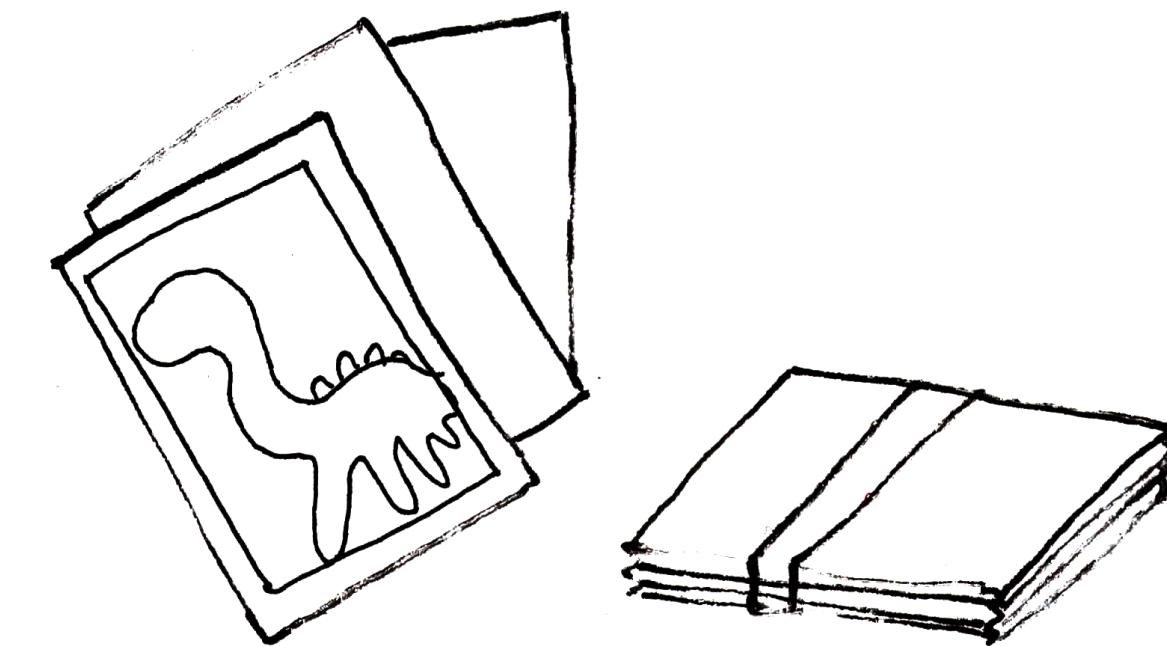

Practical Part

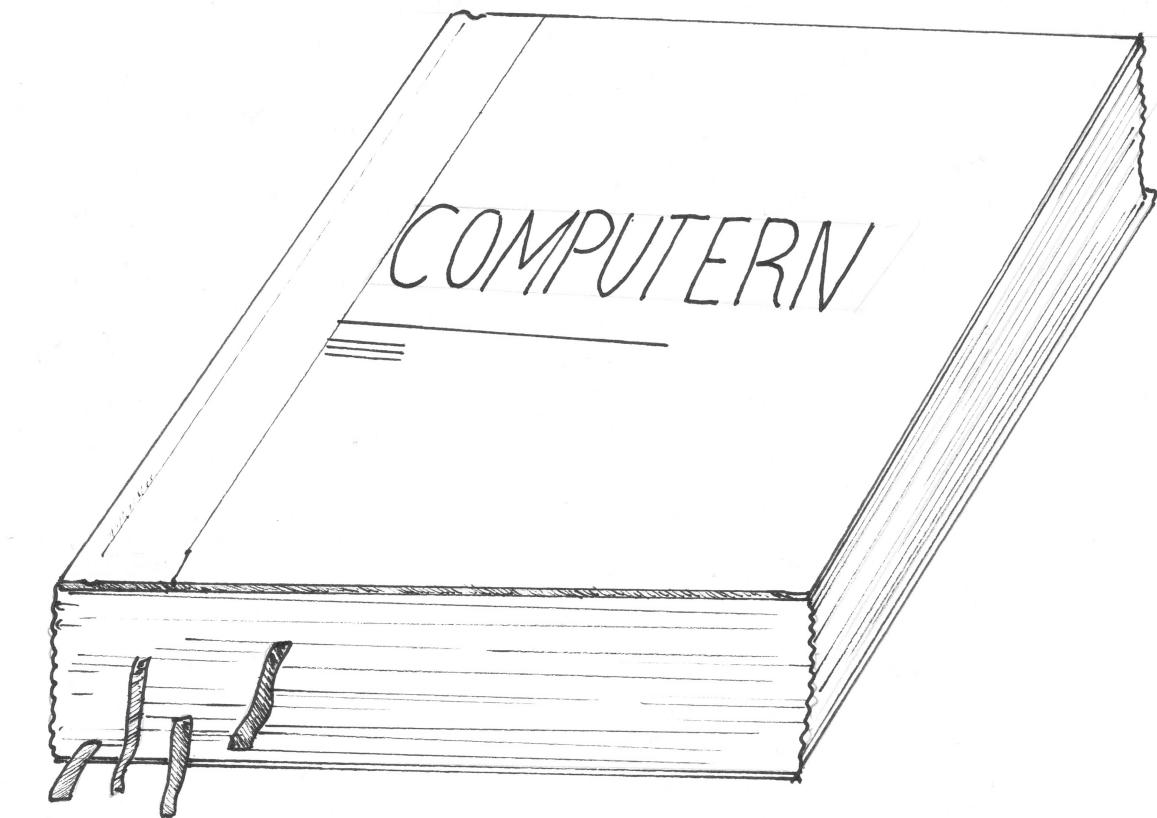

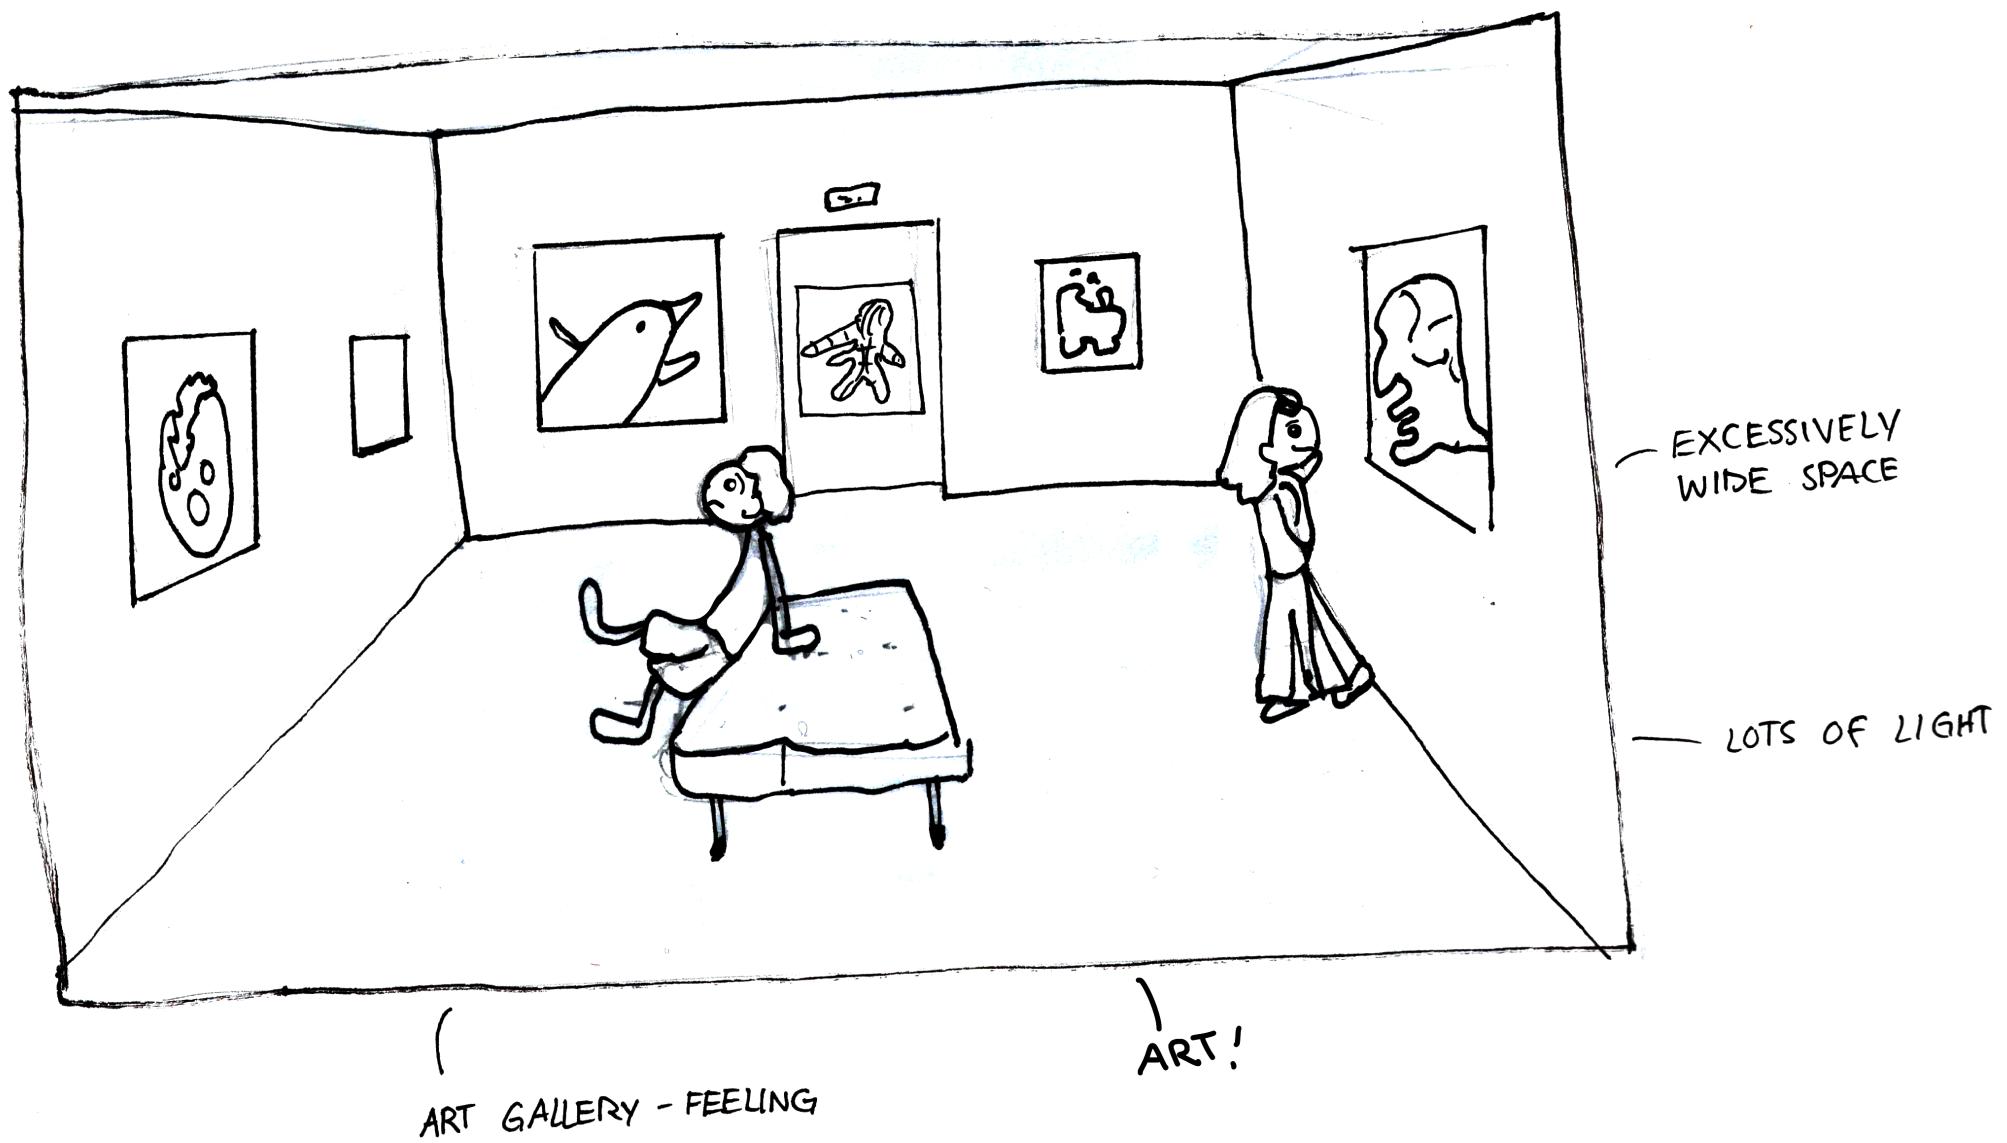

Visitors can expose themselves to an extremely low usefulness :

Beautiful Asominations from groundbreaking basic research

A set of postcards
as takeaway
